MEET OUR TEAM

A passionate group of students from around the world — combining creativity, engineering, and collaboration to build the future of UAVs.

SOFTWARE Frontend & backend developers building the brains of our UAVs.

Aboubacar
Software Team Leader

Abdullah
Image Processing & Drone
Vision

Aine
Telemetry

Azra
Software Developer

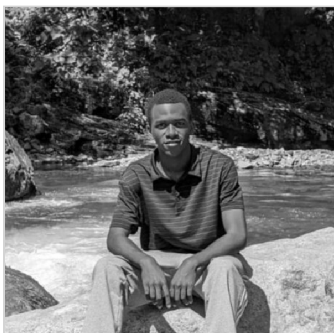

Najib
Image Processing & Drone
Vision

Rabeeah
Website Architect

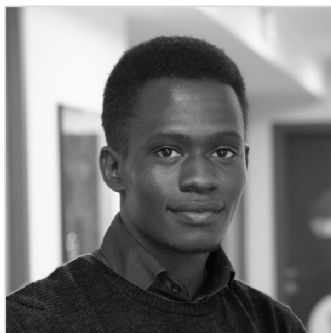

ELECTRONICS Circuit designers and electronics specialists making drones fly.

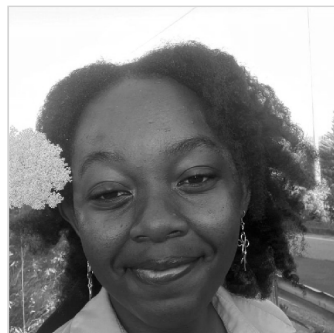

William
Electronics Team Leader

Ahmed Mulki
Electronics Team Member

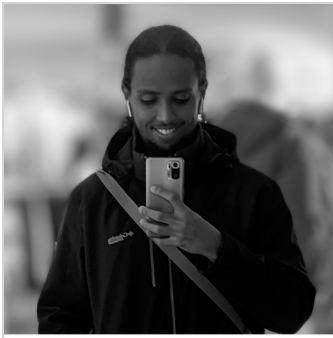

Ricky
Electronics Team Member

Zawadi
Electronics & Software
Integration

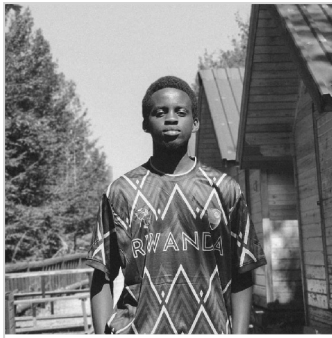

MECHANICAL

Frames & aerodynamics experts keeping drones stable and agile.

Ahmed Osman

Captain — Mechanical
Design

Henry

Mechanical Team Member

Hilmi

Mechanical Design & BOM

COORDINATORS

Keeping the team organized and projects on track.

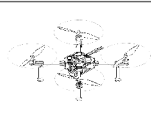

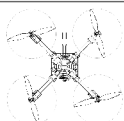

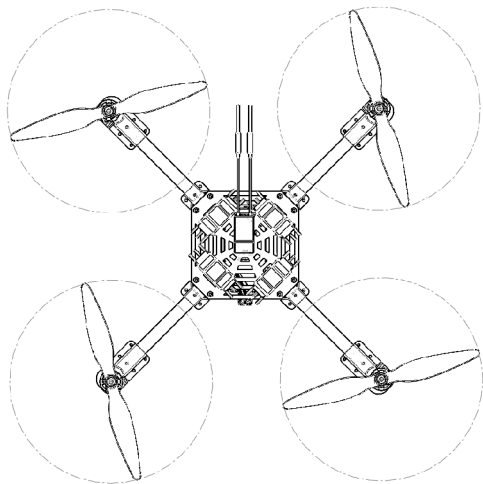

Lujain

Coordinator — Team Support
& Events

OUR PROJECTS

Here we showcase the drones we are building and those completed, including images, specs, and BOM.

PROJECT · 01

VESPASIAN

Lightweight quadcopter prototype featuring carbon fiber arms and 3D printed PLA body components, designed for stability, modularity, and precision performance.

WEIGHT

650 g

MAX TAKEOFF

1.2 kg

FLIGHT TIME

~8 min

FRAME

330 mm

MOTORS

4× BLDC

FIRMWARE

Betaflight
